

# Coursework – Sampling & Materials

## Your Sample

What is your **target population**?

Under ideal circumstances, what would your **sample(s)** of participants consist of?

How are you going to arrange a sample as close to this as possible (think practically)?

What sort of **sampling technique** is this?

## Your Materials

In the space below, list **all** the materials you will need to carry out your study. Some of these will be easily available, some will require development, which you will have to do. Highlight all the materials that will require development by you.
